# PRODUCT GUIDE 2010/2011

**They Stay Sold!**

## About Earlex:

- Earlex is a UK based manufacturing company with over 20 years experience.
- Earlex is the largest manufacturer and the #1 brand worldwide in HVLP paint sprayers and wallpaper strippers.
- Earlex's US headquarters are located in Charlotte, NC and offers a complete product range of Spray Station HVLP paint sprayers and wallpaper strippers for DIY'ers and contractors.

Earlex believe in offering quality and affordability to the consumer, profitability to the retailer and a product that stays sold.

If you're selling paint brushes and rollers then you need to sell a paint sprayer also, however it needs to be a paint sprayer that you can confidently sell.

If you're selling chemical wallpaper removers then you need to offer a steam wallpaper stripper as part of the product offer.

Consumers are already buying both today from home centers and paint stores.

Earlex will deliver to you a profitable, quality solution and ensure you keep these customers in your stores as opposed to sending them to the competition.

# SprayStation

## How does a Spray Station work?

The Earlex Spray Station uses High Volume Low Pressure (HVLP) technology. Used by professionals for decades, this technology makes it easy to set up, easy to spray and easy to clean up. By spraying you can achieve a much better quality finish than with a brush or roller and it's faster too!

### How it works

### “HVLP has many benefits”

- Faster than a brush or roller.
- Uses less paint than a brush or roller.
- Leaves no brush or roller marks creating a quick and easy professional-looking finish.
- Can be used inside or outside with a wide variety of materials.
- Great for all jobs around the house, in the shop or on the job site.
- Can paint everything from interior walls and trim to fences, furniture and cars.
- Quick and easy clean-up.
- Low overspray ensures higher paint transfer efficiency and means less masking has to be done.

## They Stay Sold!

# Spray Station 1900

## Designed as an entry-level paint spraying system

The 1900 is ideal for the first time or occasional sprayer on a limited budget.

This lightweight, versatile sprayer works great on small to medium sized projects inside and outside the home with many thin – medium bodied materials such as deck stains or sealants.

Receive low overspray and a quick and effortless clean-up with the project spray gun.

### Technical Specs:

- Project gun
- 1 qt. paint container
- 400 watt
- 9' hose
- 6' power cord
- 28 CFM
- 2 PSI
- DIN/Sec Rating = 50

**Only 6 minutes!**

### Can spray:      Used for:

- |                 |                    |
